RE: Save A Life Tour

Dear Frank,

On behalf of the St. Louis Regional Safety Blueprint Coalition, we would like to recognize our continued partnership in teen driver highway safety, raising awareness of the dangers of driving impaired, distracted, and unbelted. Since introducing the Save A Life Tour to our region in 2016, we have worked collaboratively to bring a driver safety program to over 40 high schools, colleges, and highway officials in our 5 county region. Thousands of teenagers and others have had the opportunity to witness the effects of driving impaired or distracted and been able to experience it first hand in a safe environment. The Save A Life Tour (SALT) simulators and presentation play a significant role in our overall St. Louis Youth Drive For Tomorrow teen driver program to reduce fatal and serious injury type crashes on Missouri roadways. The SALT presenters are passionate about driver safety and have been great to work with at the schools. In addition, your insight and efforts to arrange the program in the schools have been highly regarded and crucial to ensuring a successful program.

We appreciate and value your cooperation and genuine concern for highway safety. This has made our program a success in the region and we look forward to future opportunities.

Respectfully,

Teresa Krenning
